

Puzzle Pieces

Level of Need

The Level of Need will be determined through the INTAKE process, after further information is provided. The determination process is not limited to the requirements listed below.

Level ONE	Level TWO	Level THREE
<i>Client requires one-on-one supervision and/or support to complete daily activities.</i>	<i>Client requires some extra supervision and/or support to complete daily activities.</i>	<i>Client requires minimum supervision and can complete most daily activities with no extra prompts.</i>
* He/She needs daily hygiene assistance with the use of the bathroom.	* He/She may require at times hygiene assistance when she/she has an accident throughout the day.	* He/She may require a few verbal prompts to complete activity.
* He/She is non-ambulatory and requires multiple lifts throughout the day to be changed or for therapy.	* He/She needs verbal prompting/modeling/physical support to complete most activity successfully.	* He/She is independent when using the bathroom.
* He/She has behavior concerns that will require preventative strategies to be implemented.	* He/She needs a picture schedule/transitional supports in order to be successful throughout the day.	* He/She can be responsible and make good choices without constant supervision.
* He/She can have impulsive behaviors (i.e. biting, head butting, kicking, pinching, running away, etc.) at times throughout the day.		* He/She can follow rules that are set most of the time.
